Executive Summary:

The Abu Sayyaf Group (ASG) is an Islamist terrorist organization that seeks to establish an independent Islamic state in the southern [Philippines](#) [1]. ASG is known for kidnapping innocents, including Westerners, for ransom, and beheading captives if their demands are not met. ASG's brutal decapitations date back to 2001, predating notorious beheadings carried out by al-Qaeda in Iraq and that group's successor, [ISIS](#) [2].⁵ ASG is also known for its relationship with al-Qaeda, which has become strained since the beginning of the U.S.-led Global War on Terror.⁶ The group is divided into two main factions: [Radulan Sahiron](#) [3], one of the United States' most-wanted terrorists, leads the ASG faction based in Sulu, while

Abu Sayyaf Group (ASG)

a pro-ISIS faction was spearheaded by Basilan-based ASG leader [Isnilon Hapilon](#) [4] before Hapilon's death in October 2017.⁷

In the summer of 2014, Hapilon and his followers pledged allegiance to ISIS leader [Abu Bakr al-Baghdadi](#) [5]. The pledge drew attention to ASG's presence in the southern Philippines and its potential threat to Southeast Asia.⁸ According to the Philippines' Secretary of National Defense Delfin Lorenzana, ISIS made direct contact with Hapilon in December 2016, instructing him to find an area to establish a caliphate in Mindanao.⁹ Afterward, Hapilon reportedly attempted to unite ISIS-supporting groups throughout the Philippines under his leadership.¹⁰ In May 2017, the Philippine military launched an operation to target Hapilon in the city of Marawi. The operation devolved into a five-month-long armed conflict that displaced over 350,000 civilians, during which ASG and ISIS-linked militants laid siege to the city.¹¹ The conflict ended shortly after Philippine troops killed Hapilon on October 16, 2017.¹² In February 2019, the Associated Press reported that Hatib Hajan Sawadjaan, an ASG commander based in Jolo, became the new leader of ISIS in the Philippines. The U.S. Department of Defense believes Sawadjaan to be "acting emir," but Philippine officials claim that he was installed as head of ISIS in the Philippines the year prior.¹³

ASG has received funding and training from [al-Qaeda](#) [6] and [Jemaah Islamiyah \(JI\)](#) [7].¹⁴ ASG continues to provide sanctuary to foreign militant jihadists, such as JI fugitives.¹⁵ The group also maintains links with other Philippines-based extremist organizations, including the more violent splinter groups of both the Moro National Liberation Front (MNLF) and the Moro Islamic Liberation Front (MILF).¹⁶

ASG was founded by and named after Abdurajak Janjalani, who took the *nom de guerre* Abu Sayyaf, "Father of Swordsmen." Janjalani previously participated in the MNLF, which, like ASG, sought to create an independent Islamic state in the Moro¹⁷ regions of Mindanao in the Philippines.¹⁸ However, unlike ASG, the MNLF was willing to negotiate with the Philippine government (which it did, beginning in 1989) to achieve Moro autonomy.

Unhappy with the MNLF's 1989 agreement with the Philippine government establishing the Autonomous Region in Muslim Mindanao (ARMM),¹⁹ Janjalani and other radicals formally split from the MNLF in 1991 to form al Harakat al Islamiyya (the Islamic Movement),²⁰ later known as ASG.²¹ They refused to settle for anything less than an independent Islamic state—and believed their only path to achieving that goal was through violent jihad.²²

In 1998, Philippine forces launched a counterterrorism raid on Basilan Island, killing ASG founder Abdurajak Janjalani in the ensuing shoot-out.²³ After his death, ASG splintered into two factions: one headed by Janjalani's brother, Khadaffy Janjalani, on Basilan Island, and a second, headed by Ghalib Andang, a.k.a. Commander Robot, in the Sulu Archipelago.²⁴

During this period, ASG shifted its tactics from jihadist activities to terrorism conducted to meet the basic survival needs of the organization. Creating revenue through terrorism had been discussed internally among ASG's leadership beginning in 1995, when Mohammed Jamahl Khalifa, ASG's main conduit to funding from al-Qaeda, was barred by the Philippine government from returning to the country.²⁵ Andang advocated for the strategic use of kidnapping for ransom, believing that tactic would not only help bankroll ASG but raise the group's profile and distinguish it from the more mainstream and increasingly less violent Moro organizations, such as the MILF and the MNLF.²⁶

The Philippines received significant counterterrorism support from the United States in the aftermath of the September 11, 2001, attacks. In 2002, the two countries launched Operation Enduring Freedom-Philippines, which set back ASG's operations significantly. In March 2005, the counterterrorism force assassinated Commander Robot and later killed other potential rivals, leaving Khadaffy Janjalani positioned to assert control over all of ASG.²⁷

Khadaffy reoriented ASG toward committing ideologically motivated, large-scale terrorist attacks and to the goal of his late brother—establishing an Islamic state in the southern Philippines.²⁸ Nonetheless, the group's membership

Abu Sayyaf Group (ASG)

declined—another consequence of the Philippine-U.S. crackdown. The group’s numbers fell to 250 fighters in 2005 from a peak of 1,269 in 2000.²⁹ ASG is believed to be comprised of 300 to 400 armed militants as of February 2019.³⁰

Khadaffy Janjalani died in a shootout with Philippine forces on September 4, 2006, creating another power vacuum within the group. ASG then splintered along clan lines into smaller alliances, and the group returned to less ambitious terror activities. ASG factions in the Sulu archipelago continue to rely on kidnapping-for-ransom operations for its members’ survival and as a monetary incentive for recruitment.³¹ However, ASG, primarily the Basilan-based faction, has also engaged in increasingly large-scale terror plots that appear to be targeted toward the group’s ideological objectives.³²

Throughout its existence, ASG has engaged in terrorism and guerilla warfare, targeting Catholics and Westerners, as well as locals of the villages ASG has infiltrated.³³ In many ways, ASG functions as an organized crime ring. Aside from pledging allegiance to ISIS in late July 2014, recent major group activities reflect members’ greed rather than extremist pursuits.

One ASG analyst calls the group an “entrepreneur of violence.”³⁴ On the other hand, ASG is considered a resilient extremist group, willing to exploit opportunities for violence whether motivated by financial gain or Islamist ideology.³⁵

Doctrine:

ASG seeks to establish an independent Islamic state in western Mindanao and the Sulu Archipelago, the predominately Muslim region in the south of the Philippines. ASG derives its ideology from the group’s eponymous founder, Abdurajak Janjalani, a.k.a. Abu Sayyaf.

In the early 1990s, Janjalani issued a public proclamation—the “Four Basic Truths”—which came to define ASG’s goals and ideology. The first “truth” emphasizes that ASG should serve as a bridge and balance between MNLF and MILF and should recognize the early leadership of both groups in the struggle for Moro liberation. Second, ASG’s ultimate goal is to establish in Mindanao an Islamic government whose “nature, meaning, emblem and objective” are synonymous with peace. However, the third truth asserts that the advocacy of war is necessary so long as oppression, injustice, capricious ambition, and arbitrary claims are imposed on Muslims. Lastly, ASG believes that “war disturbs peace only for the attainment of the true and real objective of humanity. That objective is the establishment of justice and righteousness for all under the law of the Koran and Sunnah.”³⁶

Before Janjalani died in December 1998, he gave eight radical ideological discourses, called *khutbahs*. Janjalani asserted that Muslim scholars in the Philippines did not truly know the Quran, and therefore Filipino Muslims were not practicing pure Islam, unlike the Islam practiced widely in Indonesia and Malaysia. In the discourses, Janjalani revealed his knowledge of Wahhabism, which he learned while studying theology and Arabic in Libya, Syria, and Saudi Arabia. The Wahhabist brand of Sunni Islam is echoed in ASG’s early ideology, wherein members advocated for reforming Philippine Islamic practice, making it more pure and ultra-conservative.³⁷

Since Janjalani’s death, ASG has lacked an ideological leader, stunting the group’s doctrinal development. The group’s preoccupation with illicit profits appears to have taken priority over ASG’s stated objective of creating an independent Islamic state in the southern Philippines.³⁸ This is evidenced by the apparent lack of ideologically motivated recruitment efforts by ASG. Several analysts, such as Joseph Franco, research fellow at Nanyang Technological University in Singapore, believe that the group is driven primarily by financial gain.³⁹

Other experts such as Sidney Jones of the Indonesia-based Institute for Policy Analysis of Conflict, however, believe that the rise of ISIS helped unify disparate Islamist militants in the Philippines under one ideological banner.⁴⁰ Despite ISIS’s territorial losses in the Middle East, the terrorist group has inspired ASG fighters to help launch jihadist attacks. For example, on June 28, 2019, two suicide bombers killed five Philippine soldiers in an attack in Jolo, Sulu. ISIS claimed responsibility for the attack, and local authorities suspected that the ASG faction loyal to the global terrorist group were to blame. One of the suspected assailants was the first known Filipino militant to carry out a suicide bombing.⁴¹

Abu Sayyaf Group (ASG)

Organizational Structure:

ASG was a highly centralized organization under the leadership of ASG founder Abdurajak Janjalani. ASG's hierarchy included a Majelis Shura Council and a separate military arm.⁴² Since Janjalani's death in 1998, however, ASG has increasingly descended into bands of armed groups scattered throughout the southern Mindanao region.⁴³

Analysts such as Rommel Banlaoi of the Philippine Institute for Peace, Violence, and Terrorism Research believe that this decentralized structure has enabled ASG to stay resilient, allowing the group to form partnerships with other Islamist cells that operate in the southern Philippines.⁴⁴ ASG has also been able to build its finances by tapping into an existing network of narco-traffickers who reportedly help propel ASG's illicit drug activities, including running marijuana rings.⁴⁵ ASG's network also pressures local populations to allow ASG to operate amongst them.⁴⁶

Two major factions have been operating under the ASG banner in recent years: the Sulu-based faction headed by Radulan Sahiron and an ISIS-supporting faction, historically based in Basilan, led by Isnilon Hapilon before his death in October 2017.⁴⁷

Sulu-Based Faction

[Radulan Sahiron](#) [3], one of the United States' most-wanted terrorists, leads the ASG faction based in Sulu.⁴⁸ Sahiron was named the leader of ASG following Khadaffy Janjalani's death in 2005, though ASG members who support ISIS consider Hapilon to be ASG's leader.⁴⁹ Sahiron and the Sulu-based faction have reportedly rejected ISIS and remain committed to the realization of a local, regional caliphate.⁵⁰ However, there were reports of an alignment between the groups when ISIS's Amaq News Agency claimed attacks carried out by the Sulu-based faction in May and June of 2017.⁵¹

ASG's Sulu-based faction is primarily responsible for the series of high-profile ASG kidnappings, beheadings, and piracy attacks in Mindanao.⁵² According to the Philippine military, Sahiron signaled in April 2017 that he may be willing to negotiate for his surrender following a wave of sustained military offenses in Sulu.⁵³

ISIS and the Basilan-Based Faction

In February 2019, the Associated Press reported that Hatib Hajan Sawadjaan, an ASG commander based on Jolo, became the new leader of ISIS in the Philippines. The U.S. Department of Defense believes Sawadjaan to be "acting emir," but Philippine officials claim that he was installed as head of ISIS in the Philippines in 2018. Sawadjaan had been active in the Sulu-based faction under Sahiron, but he reportedly split from Sahiron over the latter's disinterest in integrating foreign militants.⁵⁴ Sawadjaan controls between five or six sub-groups within ASG, consisting of a total of approximately 100 fighters.⁵⁵ It was reported that pro-ISIS groups in the Philippines convened a meeting in May or June 2019 and officially selected Sawadjaan as their leader.⁵⁶ He is believed to have harbored foreign terrorists and Islamist extremists, including the Indonesian couple that carried out the January 2019 Cathedral bombing in Jolo, Sulu.⁵⁷ The attack was orchestrated by a cell under Sawadjaan, known as the Ajang-Ajang.⁵⁸ Sawadjaan is also linked to a number of high-profile kidnappings and executions, including the beheadings of two Canadians in 2016.⁵⁹

[Isnilon Totoni Hapilon](#) [4], the former leader of ISIS in Southeast Asia, led the ASG faction that has historically been based in Basilan in southern Mindanao before his death on October 16, 2017. According to the Philippine military, ISIS leaders in Syria made direct contact with Hapilon and called on him to stake out possible areas for a caliphate in Mindanao. Following ISIS orders, Hapilon and other Basilan-based members reportedly moved to central Mindanao in an attempt to unite with other ISIS-supporting terrorist groups in the country.⁶⁰

In July 2014, Hapilon and his militants pledged allegiance to ISIS leader Abu Bakr al-Baghdadi.⁶¹ The Basilan-based group

Abu Sayyaf Group (ASG)

under Hapilon effectively ceased most of its kidnapping activities after the pledge.⁶² In January 2016, Hapilon's group, using their alternative name Harakatul Islamiyah (Islamic Movement), again pledged allegiance to ISIS in a video posted online and named Hapilon the leader of ASG.⁶³ Hapilon and his faction received international attention in May 2017 when they were the target of a Philippine military raid in Marawi City that devolved into a violent siege and resulted in President Rodrigo Duterte calling for martial law in Mindanao. The raid was originally carried out to target Hapilon, who was allegedly in Marawi to meet with the Maute Group, an ISIS-linked group based in the area.⁶⁴ Hapilon was killed in a military operation in the city of Marawi on October 16, 2017.⁶⁵ The following day, Duterte announced the liberation of Marawi from ISIS-affiliated militants.⁶⁶

Following Hapilon's death, Furuji Indama is believed to have taken charge of the Basilan-based ASG faction.⁶⁷ It is not known whether Indama has pledged allegiance to ISIS or what connection he has with militants who supported Hapilon's shift to ISIS.⁶⁸ In 2019, Philippine police arrested a number of ASG members operating under Indama, including one suspect linked to a 2015 bombing at a bus terminal that killed an 11-year-old girl.⁶⁹

Financing:

ASG's main funding sources are its kidnapping-for-ransom and extortion enterprises. ASG primarily targets Westerners and other wealthy foreign nationals for kidnapping. The group has also been known to target local politicians, business people, and civilians.⁷⁰ In addition to its dependence on ransom, ASG engages in extortion, collecting so-called taxes from businesses and locals within ASG's areas of influence. The group also offers 'protection' to certain local moneymaking endeavors, reportedly including marijuana farms in the Sulu Archipelago.⁷¹ In February 2018, the Department of Public Works and Highways in the Autonomous Region in Muslim Mindanao (DWPH-ARMM) reported that ASG threatened to delay the implementation of vital infrastructure projects in Basilan if the militants were not paid "protection money" of at least 200,000 Philippine pesos.⁷²

In addition to violent and criminal activity, ASG has reportedly received funding and logistical support through a network of jihadist groups, including [Hezbollah](#) [8], Jamaat-e-Islami, Hizbul-Mujahideen in Pakistan, Hizb-i-Islami Gulbuddin in Afghanistan, al Gama'a al-Islamiyya in Egypt, International Harakatu'l al-Islamia in Libya, and the Islamic Liberation Front in Algeria.⁷³ ASG has also received funds from [Jemaah Islamiyah \(JI\)](#) [7]. In exchange, ASG continues to harbor JI militants who provide in-kind assistance to the group, in the form of military and bomb-making training.⁷⁴

ASG received a majority of its seed funding from [al-Qaeda](#) [6]. The most notorious ASG financier was one of Osama bin Laden's brothers-in-law, Mohammed Jamal Khalifa. From the late 1980s to the early 1990s, Khalifa established a Philippine branch of the Saudi-based International Islamic Relief Organization (IIRO), an illicit charity organization used to channel funds to ASG.⁷⁵ ASG's leadership used the funds to pay for training its members and building up its arms.⁷⁶ In the mid-1990s, Mahmud Abd al-Jalil Afif ran the IIRO Philippines, using the organization to funnel money to terrorist groups, and was a major ASG supporter.⁷⁷ In June 2014, ASG senior leader Khair Mundos was arrested after a seven-year manhunt, having been designated as a U.S. most-wanted terrorist. Mundos confessed to transferring funds from al-Qaeda to former ASG leader Khadaffy Janjalani. The funds were earmarked for use in bombings and other criminal acts throughout Mindanao.⁷⁸ In 1995, Khalifa was refused re-entry into the Philippines for his association with Ramzi Yousef, who plotted the 1993 World Trade Center attack and the Bojinka Plot. Consequently, ASG lost a major financial pipeline and connection to al-Qaeda Central.⁷⁹

ASG has also received funding through remittances from Filipinos working overseas and from other extremists in the Middle East.⁸⁰ Philippine officials maintain that funds secured through these channels are miniscule compared to ASG's other sources of funding. Authorities maintain that this pipeline may be unintentional, as money sent to Filipino families may be intercepted by ASG operatives via wire transfer agencies and redirected to ASG's coffers.⁸¹ Remittances from

Abu Sayyaf Group (ASG)

Overseas Filipino Workers (OFWs) are an integral component of the Philippine economy, accounting for nearly 10 percent of the country's GDP.⁸² OFWs working in Western or Middle Eastern countries send money through a wire transfer agency, such as MoneyGram or Western Union and their agents in the Philippines. Some OFWs are unaware that their money is channeled to the extremist group, while other OFWs may be sympathetic to ASG's cause or are relatives or friends of the militants.⁸³

Following the siege of Marawi in 2017, the Philippine military chief revealed that ISIS had funneled a "couple of million dollars" to Hapilon's faction. The terrorist organization reportedly sent at least \$1.5 million to finance the siege, which began in May 2017 and killed more than 1,100 people and displaced approximately 400,000 residents.⁸⁴

Recruitment:

Traditionally, ASG draws members from clan and family groups.⁸⁵ According to the Australian government, most of ASG's new recruits (as of 2013) are young Muslims from the impoverished southernmost islands of the Philippines, primarily the main Mindanao region and the Sulu Archipelago. At times, the group has also absorbed foreign fighters into its ranks, including Indonesian⁸⁶ and Malaysian⁸⁷ jihadists.

According to Australian intelligence, ASG works to recruit members so that it maintains a base of at least 400 fighters. Despite these reported aspirations, ASG membership appears to have fluctuated significantly—increasing in correlation with the success of its terror operations, and then decreasing as pressure mounts from the Philippine military. According to Filipino security analyst Rommel C. Banlaoi, ASG's illicit operations have enhanced the group's resources and reputation, facilitating recruitment.⁸⁸

Many of the areas in the southern Philippines where ASG is most active—the Sulu Archipelago, Basilan, and Tawi-Tawi—lack economic opportunities and infrastructure. Locals rely on subsistence fishing and struggle with difficult agricultural conditions.⁸⁹ Recruits to ASG appear to be primarily motivated by the promise of wealth and status rather than ideological fulfillment. This is unsurprising, given the group's vacillation between jihadist-style, ideologically driven operations and criminal activity for financial gain.⁹⁰ For example, in the Sulu Archipelago, Basilan, and Tawi-Tawi, poor Muslim parents volunteer their sons to join ASG in exchange for monthly food supplies and financial support amounting to a few hundred dollars.⁹¹

In some cases, youths joined ASG as a status symbol, setting themselves apart from their peers who sought criminal activity through ordinary street gangs. Other recruitment motivations have included ASG's marijuana production and openness to use of the drug, revenge for family members killed by the Philippine police or military, or clan conflicts that abound in Mindanao.⁹² ASG exploits youth in these underserved and marginalized areas, seducing them with the promise of wealth or notoriety. More recently, the group has used its pledge to ISIS as a propaganda tactic to bring in new recruits.⁹³

During the Marawi siege that began in May 2017, ASG members and other militants documented their victories—real or perceived—and clashes with Philippine government forces on ISIS social media accounts.⁹⁴ According to a report from the Indonesia-based Institute for Policy Analysis of Conflict, Filipino fighters who posted on ISIS-supporting Telegram channels were able to create an international constituency for the Marawi jihad. They used social media to perpetuate the narrative that the Philippine government was to blame because of its oppression of Muslims in Mindanao and, during the siege, for destruction of the city.⁹⁵

Training:

Both al-Qaeda and JI have trained ASG members in guerrilla warfare, military operations, and bomb making.⁹⁶ Before the 2001 war in Afghanistan, ASG members occasionally trained there with al-Qaeda. After the post-9/11 crackdown on al-Qaeda and its affiliates, the cooperation between the larger group and ASG has been limited. However, several ASG

Abu Sayyaf Group (ASG)

members who trained with al-Qaeda are still active. The U.S. National Consortium for the Study of Terrorism and Responses to Terrorism (START) claims that ASG members receive continued operational guidance from al-Qaeda affiliates who are in hiding or visiting the Philippines.⁹⁷

ASG has a long history of receiving training in bomb-making and weapons from foreign terrorists. Ramzi Yousef—perpetrator of the 1995 World Trade Center bombing—trained a small ASG cadre in bomb-making, having experimented with various bombs and explosives in an apartment in the Philippines.⁹⁸ Two well-known Indonesian JI members—Dulmatin and Umar Patek, the masterminds behind the deadly 2002 Bali bombings—traveled to the Philippines to train ASG militants. Philippine intelligence identified the two as key trainers on the manufacture and use of improvised explosive devices (IEDs).⁹⁹

ASG has become adept at maritime terror attacks, as evidenced by its targeting of ferries and various sea vehicles carrying tourists. Almost all members of ASG have some knowledge of the maritime domain, as descendants from a long Moro tradition of seafaring and subsistence fishing. To further its kidnap-for-ransom agenda, ASG trains its members to overtake and attack boats, ships, and barges.¹⁰⁰

¹⁷ The term “Moor”—“Moro” in Spanish—comes from the Muslim Arab and Berber peoples who invaded what became modern-day Spain and

Abu Sayyaf Group (ASG)

Portugal in the 700s. The Spanish came to refer to Muslims in North Africa by this term in the pre-colonial period. When Spanish colonists came to the Philippines in the 15th century, they again used “Moro” to describe darker-skinned, indigenous Filipino Muslims who attempted to push back against colonial expansion on their lands. While the term was once considered offensive, Filipino Muslims have taken ownership of it, calling themselves Moro and coining the term Bangsamoro (“bangsa” meaning state or nation) to describe their homeland.

Violent history:

ASG's terror attacks can be categorized as either ideologically charged violent jihad or profit-seeking terror activities. The first group includes large-scale terror attacks targeting strategic assets, such as bombing Philippine military bases or law enforcement facilities. This group also includes attacks, kidnappings, and beheadings of Western targets such as missionaries and tourist destinations. The second type of terror activity, which includes kidnapping for ransom, has become ASG's *modus operandi*. These smaller-scale attacks are not necessarily ideologically motivated but are instead used to finance the group, along with extortion from businesses, forced taxation of locals, and kidnap-for-ransom operations.

Associations:

Ties to Extremist Entities:

[Al-Qaeda](#) [122]

[ISIS](#) [123]

ASG has enjoyed a historically symbiotic relationship with al-Qaeda, receiving funding and training from al-Qaeda and its network in return for a safe haven and operational support for al-Qaeda operatives. During 1991 and 1992, Ramzi Yousef—perpetrator of the 1993 World Trade Center bombing—traveled in and out of the Philippines with Abdurajak Janjalani.¹⁷⁰ Yousef was able to return to the Philippines after the 1993 bombing unscathed and began planning what was to be known as the Bojinka plot with Khalid Sheikh Mohammed (KSM).¹⁷¹ The duo planned to bomb at least 12 Western airliners traveling over the Pacific Ocean. ASG provided operational support to the two.¹⁷²

Ultimately, the Bojinka plot failed due in part to a chemical fire that Yousef started in his kitchen in Manila while attempting to create a liquid explosive device. The fire attracted the Philippine police, who in turn shared recovered files with the United States.¹⁷³ According to the *9/11 Commission Report*, KSM first conceived of using aircraft as weapons during this time, later inspiring him to reemploy this strategy for the 9/11 attacks on the World Trade Center and the Pentagon.¹⁷⁴

Leader of ASG’s Basilan-based faction, Isnilon Hapilon, flanked by a group of guerrillas, pledged allegiance to ISIS leader [Abu Bakr al-Baghdadi](#) [5] in the summer of 2014.¹⁷⁵ Though ISIS has not declared a province or wilayat in the region as of February 2017, the group reportedly endorsed Hapilon as emir for Southeast Asia in June.¹⁷⁶ In a June 2016 video, alleged Indonesian, Malaysian and Filipino fighters acknowledged Hapilon as the head of ISIS in Southeast Asia.¹⁷⁷ According to the Philippines’ Secretary of National Defense, ISIS made direct contact with Hapilon in December 2016, instructing him to find an area to establish a caliphate in Mindanao.¹⁷⁸

The Philippine government leaked a document from August 2014 that tells of close to 200 Filipinos who may have fought with ISIS. However, there were no domestic plots related to ISIS reported by the government at that time.¹⁷⁹ In a report from a major Philippine news channel, the mayor of a city on Basilan Island claimed that ISIS had been present, proselytizing in religious centers, for a few months. In the same news report, there were some local officials who claimed ISIS flags have been present since 2006. However, officials from the Armed Forces of the Philippines are skeptical that this is the case.¹⁸⁰ On September 19, 2014, photos emerged from the city of Marawi in ASG’s stronghold of southern Mindanao, showing ISIS flags and members with their faces covered in front of a mosque. The chief of police in Marawi has confirmed their presence, asserting that if they remained peaceful and actions were “within the law,” they would not be arrested.¹⁸¹ In May 2017, an ISIS-linked organization operating in Marawi, the Maute Group, became violent following a Philippine military raid on an apartment building reportedly serving as Hapilon’s hideout. According to Philippine authorities, Hapilon was in Marawi to join forces with the Maute Group. The ISIS-linked militants laid siege to the city, burning several structures as Philippine President Rodrigo Duterte called for martial law on the entire island of Mindanao.¹⁸² Hapilon and the commander of the Maute group were killed in an operation on October 16, 2017.¹⁸³

Abu Sayyaf Group (ASG)

[Jemaah Islamiyah \(JI\)](#) [124]

ASG provided a special training camp to JI militants in its stronghold of southern Mindanao. JI militants intermingled with ASG during this time, training together on subjects such as bomb making.¹⁸⁴ ASG has also been known to harbor JI militants in its dense jungle landscape. In March 2010, the Indonesian government formally requested that Philippine law enforcement track down an Indonesian national and JI trainer of the MILF and ASG known only as Sanusi. Sanusi allegedly perpetrated sectarian violence in the Sulawesi region of Indonesia, including the beheadings of three school girls in 2007.¹⁸⁵

In 2003, a key JI leader and most-wanted terrorist, Zulkifli Abdir, a.k.a Marwan, went into hiding in the ASG-controlled region in the Philippines.¹⁸⁶ In February 2015, DNA evidence confirmed that Marwan had been killed after a 12-hour bloody gunfight with the Philippine police's elite Special Action Force (SAF), during which 44 members of the SAF were killed.¹⁸⁷ However, a Philippine intelligence chief has asserted that 10 to 12 JI members continue to reside among ASG in the southern Philippines.¹⁸⁸

Moro National Liberation Front (MNLF)

Many of ASG's disaffected founding members left the MNLF in March 2007, under the tutelage of radical leader Habier Malik.¹⁸⁹ In 1986, MNLF was able to negotiate a degree of self-rule in a newly established Autonomous Region in Muslim Mindanao (ARMM). ASG has not had formal ties with the MNLF since the MNLF began political discussions with the Philippine government in the mid-1980s.¹⁹⁰

Moro Islamic Liberation Front (MILF)

Another off-shoot of the MNLF is the Moro Islamic Liberation Front (MILF), which separated from the MNLF in 1984 amidst disagreement over the MNLF's peace negotiations with the Philippine government.¹⁹¹ Though the MILF proved too moderate and secular for ASG, there are some radical elements within the MILF that have maintained ties.¹⁹² Like the MNLF, the MILF has officially distanced itself from the ASG. However, it is believed that some units of the MILF still cooperate with ASG members, providing refuge for them and their JI counterparts.¹⁹³

Media Coverage:

Pledge to Abu Bakr al-Baghdadi and ISIS

In the summer of 2014, a video was released showing Abu Sayyaf leader Isnilon Hapilon swearing allegiance to ISIS.¹⁹⁴ In its coverage of ASG's pledge to ISIS, several media outlets cite ASG's opportunistic motives as a reason for the pledge, as opposed to pure ideological alignment. Along with other smaller, regional extremist groups such as JI, ASG appears to be using the pledge for publicity to further their own agenda of recruitment.¹⁹⁵

Despite ASG's motives for supporting ISIS, media in the Philippines, Malaysia, and Australia perceive a dangerous threat in the return of Filipino foreign fighters who have joined ISIS and al-Qaeda.¹⁹⁶ In a speech to the United Nations, the Australian Foreign Minister Julie Bishop has expressed the ISIS threat to the Southeast Asia and Australia.¹⁹⁷ Likewise, in a statement before the Association of Southeast Asian Nations (ASEAN), Philippine Foreign Affairs Secretary Albert del Rosario attributed ISIS's wide support base in the country to extremist groups such as ASG.¹⁹⁸
