

*OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE'S EXTREMIST VIDEO TAKEDOWN
POLICY AND COUNTER-NARRATIVE PROGRAM*

Introduction

ISIS and other extremist groups, as well as their online supporters, have continued to exploit and misuse Google's platforms to disseminate propaganda material, despite the company having repeatedly announced increased measures to combat online extremism.¹ On July 21, 2017, Google announced the launch of one such measure—its [Redirect Method Pilot Program](#). The program is intended to target individuals searching for ISIS-related content on YouTube and direct them to counter-narrative videos, which try to undermine the messaging of extremist groups.² The Counter Extremism Project (CEP) monitors and tracks ISIS and other terrorist organizations' material on YouTube. Between August 2 and August 3, 2018, CEP reviewed a total of 649 YouTube videos for extremist and counter-narrative content. The result of CEP's searches highlights the extent of the enduring problem of terrorist content on YouTube and undermines claims touting the efficacy of the company's efforts to combat online extremism.

Key Findings

- Of the 649 videos sampled by CEP, **36³ videos** (more than 5.5%) were determined to include extremist propaganda, glorification of extremism, or violent extremism associated with the following extremist or internationally-sanctioned terrorist organizations: ISIS, the Nusra Front, the Taliban, Hezbollah, Hamas, the ISIS-affiliated Abu Dar al-Ghafari Brigade, Jaysh al-Islam (Army of Islam), Ahrar al-Sham, Jund al-Aqsa, and Tahrir al-Sham.
- Of the 36 videos found to have included extremist content, a total of **18 videos** (50% of the 36 extremist videos, 2.8% of the 649 videos checked) **were explicitly violent in nature and/or showed gore.**
- By comparison, CEP found **9 videos** (1.4% of the 649 videos checked) that may include counter-narrative messaging, meaning that **a user searching for extremist material on YouTube was four times as likely to encounter extremist material than counter-narratives.**
- Only 2.8% of the extremist videos found were what CEP characterized as official ISIS propaganda releases. However, 30.5% were official propaganda releases from non-ISIS extremist groups. The remaining 66.7% were various unofficial propaganda videos, combat footage, or photo montages.

¹ Sam Shead, "Google on tackling terrorism: 'We, as an industry, must acknowledge that more needs to be done,'" Business Insider, June 19, 2017, <http://www.businessinsider.com/google-announced-four-steps-to-help-tackle-terror-videos-on-youtube-2017-6>.

² For more, see Google's Redirect Method, "A Blueprint for Bypassing Extremism": <https://redirectmethod.org/downloads/RedirectMethod-FullMethod-PDF.pdf>.

³ CEP has subtracted duplicate URLs in cases where the same videos appeared twice in the data set. CEP has accordingly employed the number 36, representing distinct URLs, throughout this report to represent the number of distinct extremist video URLs found on YouTube.

***OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE'S EXTREMIST VIDEO TAKEDOWN
POLICY AND COUNTER-NARRATIVE PROGRAM***

Methodology

To gauge the efficacy of Google's counter-extremism efforts—in particular its Redirect Method Pilot Program—CEP conducted searches on YouTube for a total of six terms related to Islamic extremism. CEP focused on four keywords or phrases explicitly referenced in Google's Redirect Method Pilot Program as “suggesting positive sentiment towards ISIS.”⁴ These terms are (1) “الإسلامية الدولية” (“Islamic State” in Arabic), (2) “Al Dawla Al Islameyah” (the English transliteration of “Islamic State” in Arabic), (3) “تتمدد و باقية” (“Remaining and Expanding” in Arabic), and (4) “Baquiyah wa Tatamadad” (the English transliteration of “Remaining and Expanding” in Arabic). CEP also identified two additional Arabic-language keywords and phrases associated with Islamic extremism, (5) “المجاهدين” (“mujahideen” in Arabic), and (6) “استشهادي” (“martyrdom” in Arabic).

CEP conducted unfiltered searches on YouTube for each of the six terms and reviewed the first 100 video results for each search. For these searches, results were automatically organized by YouTube's default search algorithm for relevance. Additionally, CEP conducted filtered searches for the single term “Islamic State” in Arabic and compared these results to those of the unfiltered search. The first filter used limited the search results to videos uploaded only in the past week, and the second filter organized video results by highest view count. Once again, CEP reviewed the first 100 video results for each search. In cases where the results yielded fewer than 100 videos, CEP checked all results for extremist content. In all, CEP's searches—conducted on August 2, 2018 and August 3, 2018—manually checked 649 videos for extremist content.

Each of the 649 videos was analyzed to determine if extremist propaganda, glorification of terrorism, and/or acts of terrorist violence were present.⁵ Each of the 649 videos was also analyzed to determine if counter-narrative material was present. CEP captured various data points on each of the videos checked, including the extremist group affiliated with the video (if applicable), whether or not the videos included violent content,⁶ the upload date of the video, the number of views the video amassed by the access date, and the name of the account that uploaded the video. Extremist content was coded into three categories: official ISIS propaganda releases, official non-ISIS extremist propaganda releases (e.g. on behalf of the Nusra Front and others), and various unofficial pieces of propaganda uploaded by individual supporters of extremist ideologies or organizations.

⁴ For more, see Google's Redirect Method, “A Blueprint for Bypassing Extremism”: <https://redirectmethod.org/downloads/RedirectMethod-FullMethod-PDF.pdf>.

⁵ Videos posted by news organizations unaffiliated with terrorist groups were not tagged under this category, even if the outlets were reporting on terrorist violence and accordingly included scenes portraying acts of terrorism.

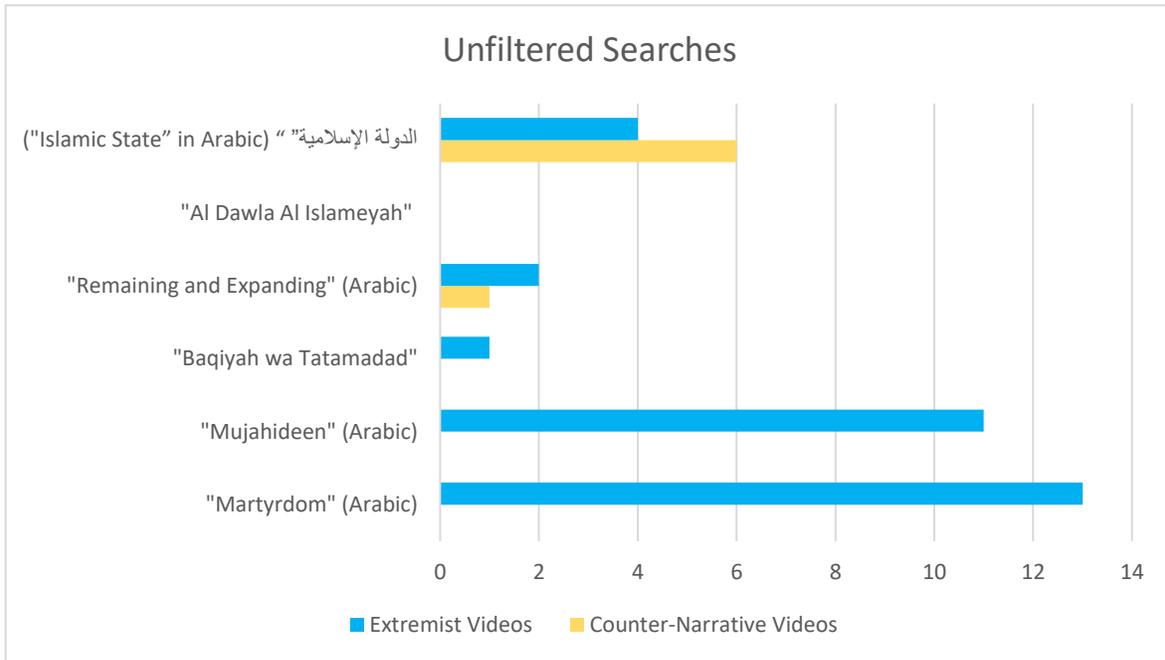

⁶ Violence here is defined as an act committed by an individual against another person designed to result in injury or death. This includes suicide bombings as well as violent acts taken against vehicles or buildings believed to be housing individuals.

POLICY AND COUNTER-NARRATIVE PROGRAM***

YouTube Unfiltered Search Results

In order to assess what a typical user searching for extremist content on YouTube would likely encounter, CEP viewed and analyzed the first 100 videos of the unfiltered search results (i.e. sorted only by YouTube’s default algorithm for relevance) for each of the six terms specified in the methodology, reviewing a total of 449 videos in the process.⁷ Counter-narrative videos only outnumbered videos with extremist content for the search results of one term—“الإسلامية الدولة” (“Islamic State” in Arabic). Although “Al Dawla Al Islameyah,” “باقية و تتمدد” (“Remaining and Expanding” in Arabic), and “Baquiyah wa Tamatadad” (the English transliteration of “Remaining and Expanding” in Arabic) were also specified by Google’s Redirect Method as terms targeted for counter-narrative messaging, “باقية و تتمدد” (“Remaining and Expanding” in Arabic) had only one counter-narrative video in its results, and the other two terms had no counter-narrative videos in their results at all.

The two terms not specified by Google’s Redirect Method—“المجاهدين” (“mujahideen” in Arabic) and “استشهادي” (“martyrdom” in Arabic)—had the most extremist videos in their search results. Neither term had counter-narrative videos in its search results.

Complete findings are as follows:

- الإسلامية الدولة (“Islamic State”)

⁷ In some cases, search filter algorithms yielded less than 100 videos. When this occurred, the maximum number of available videos (<100) were viewed.

***OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE'S EXTREMIST VIDEO TAKEDOWN
POLICY AND COUNTER-NARRATIVE PROGRAM***

- 100 videos were reviewed from an unfiltered search.
- CEP found 4 videos that included extremist propaganda, glorified extremism, or were violent extremist videos.
- 2 of the 4 videos included explicitly violent content.
- CEP counted a total of 6 counter-narrative videos using this search term.

- Al Dawla Al Islameyah (English transliteration of “the Islamic State”)
 - 39 videos were reviewed from an unfiltered search.
 - CEP found 0 videos that included extremist propaganda, glorified extremism, or were violent extremist videos.
 - CEP counted a total of 0 counter-narrative videos using this search term.

- باقية و تتمدد (“Remaining and Expanding”)
 - 100 videos were reviewed from an unfiltered search.
 - CEP found 2 videos that included extremist propaganda, glorified extremism, or were violent extremist videos.
 - 1 of the 2 videos included explicitly violent content.
 - CEP counted 1 counter-narrative video using this search term.

- Baqiyah wa Tatamadad (English transliteration of “Remaining and Expanding”)
 - An unfiltered search for this term only resulted in 10 videos. All 10 videos were reviewed.
 - CEP found 1 video that included extremist propaganda, glorified extremism, or was a violent extremist video.
 - The video did not include explicitly violent content.
 - CEP counted a total of 0 counter-narrative videos using this search term.

- المجاهدين (“Mujahideen”)
 - 100 videos were reviewed from an unfiltered search.
 - CEP found 11 videos that included extremist propaganda, glorified extremism, or were violent extremist videos.
 - 5 of the 11 videos included explicitly violent content.
 - CEP counted a total of 0 counter-narrative videos using this search term.

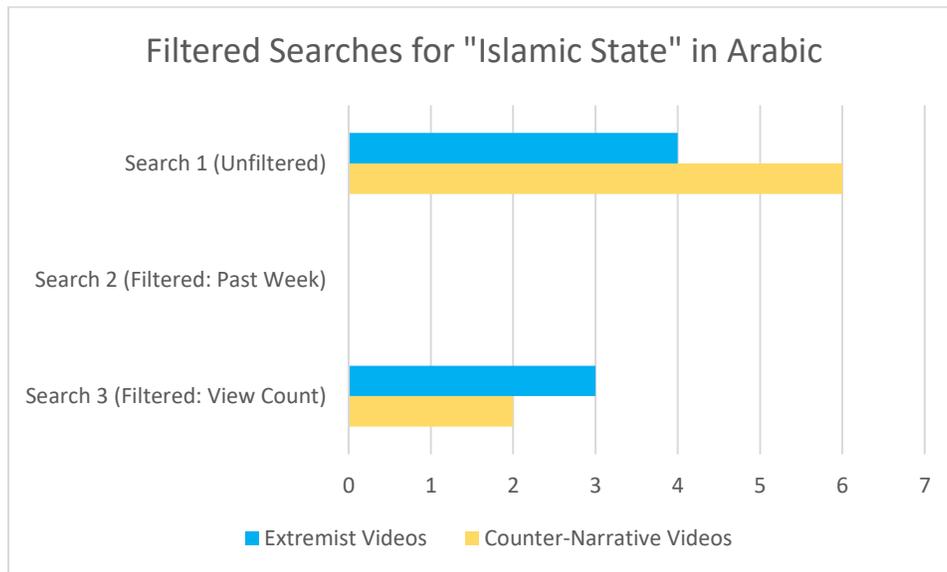

- استشهادي (“Martyrdom”)
 - 100 videos were reviewed from an unfiltered search.
 - CEP found 13 videos that included extremist propaganda, glorified extremism, or were violent extremist videos.
 - 10 of the 13 videos included explicitly violent content.
 - CEP counted a total of 0 counter-narrative videos using this search term.

***OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE’S EXTREMIST VIDEO TAKEDOWN
POLICY AND COUNTER-NARRATIVE PROGRAM***

YouTube Filtered Search Results

For the single term “الدولة الإسلامية” (“Islamic State” in Arabic)—which was specified by Google’s Redirect Method as a term targeted for counter-narrative messaging—CEP conducted two filtered searches in addition to the unfiltered search already conducted. The first filter used limited the search results to videos uploaded only in the past week, and the second filter organized video results by highest view count. CEP reviewed the first 100 videos for each search, reviewing a total of 200 additional videos in the process.

In the unfiltered search for “الدولة الإسلامية” (“Islamic State” in Arabic), CEP found 4 extremist videos and 6 counter-narrative videos. However, when the “View Count” filter was applied, which sorts search results by highest view count, extremist videos outnumbered counter-narratives: 3 extremist videos and only 2 counter-narratives appeared in the results. No extremist content or counter-narrative content appeared when the “Past Week” filter—which displays content uploaded in the past week—was applied. The suggests that Google’s efforts to insert counter-narrative content into targeted searches may not apply to equally to filtered and unfiltered searches.

- Search 1 (Unfiltered):⁸ 100 videos were reviewed from an unfiltered search.
 - CEP found 4 videos that included extremist propaganda, glorified extremism, or were violent extremist videos.
 - 2 of the 4 videos included explicitly violent content.

⁸ The data “Search 1 (Unfiltered)” is taken from the unfiltered search conducted for “الدولة الإسلامية” (“Islamic State” in Arabic) in the previous section, “YouTube Unfiltered Search Results.” The 100 videos referenced here comprise part of the 449 videos analyzed in the previous section.

COUNTER EXTREMISM PROJECT

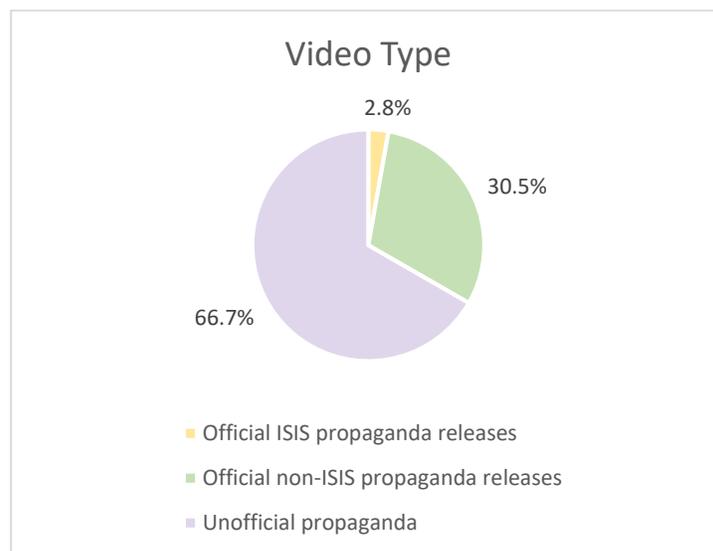

OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE'S EXTREMIST VIDEO TAKEDOWN POLICY AND COUNTER-NARRATIVE PROGRAM

- CEP counted a total of 6 counter-narrative videos using this search term.
- Search 2 (Filtered: Past Week): 100 videos were reviewed that were uploaded in the past week (7/27/2018 – 8/2/2018) and sorted by YouTube's algorithms for relevance.
 - CEP found 0 videos that included extremist propaganda, glorified extremism, or were violent extremist videos.
 - CEP found 0 counter-narrative videos.
- Search 3 (Filtered: View Count): 100 videos were viewed that were sorted by highest view count and unsorted by upload time.
 - CEP found 3 videos that included extremist propaganda, glorified extremism, or were violent extremist videos.
 - 1 of the 3 videos included explicitly violent content.
 - CEP found 2 counter-narrative videos.

Video Types

Of the 36 videos that were tagged as extremist content from all searches performed:⁹

- 1 (2.8%) was what CEP characterized as an official ISIS propaganda release (i.e. from known ISIS sources such as al-Hayat Media Center, Amaq News Agency, and Al Bayan Radio). It was found in the search results for “الدولة الإسلامية” (“Islamic State” in Arabic), suggesting that official ISIS content continues to persist even in the search results for terms specified by Google's Redirect Method.
- 11 (30.5%) were official propaganda releases from non-ISIS extremist groups.
- 24 (66.7%) were various unofficial propaganda videos, combat footage, or photo montages.

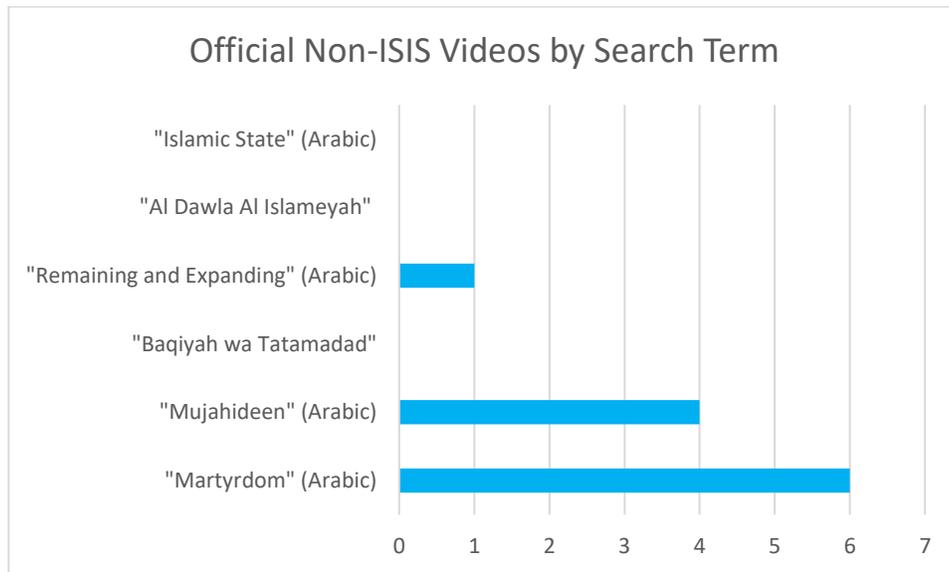

⁹ This analysis includes the 649 total videos reviewed from all searches conducted—unfiltered and filtered.

***OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE'S EXTREMIST VIDEO TAKEDOWN
POLICY AND COUNTER-NARRATIVE PROGRAM***

Of the 11 official videos from non-ISIS extremist groups posted to YouTube:

- 2 were from the Nusra Front.
- 1 was from Ahrar al-Sham.
- 1 was from the Abu Dar al-Ghafari Brigade (ISIS-aligned).
- 1 was from Hamas.
- 1 was from Hezbollah.
- 1 was from Jaysh al-Islam (Army of Islam).
- 1 was from Jund al-Aqsa (al-Qaeda-aligned).
- 1 was from the Taliban.
- 1 was from Tahrir al-Sham (al-Qaeda-aligned).
- 1 was from an undetermined extremist group.

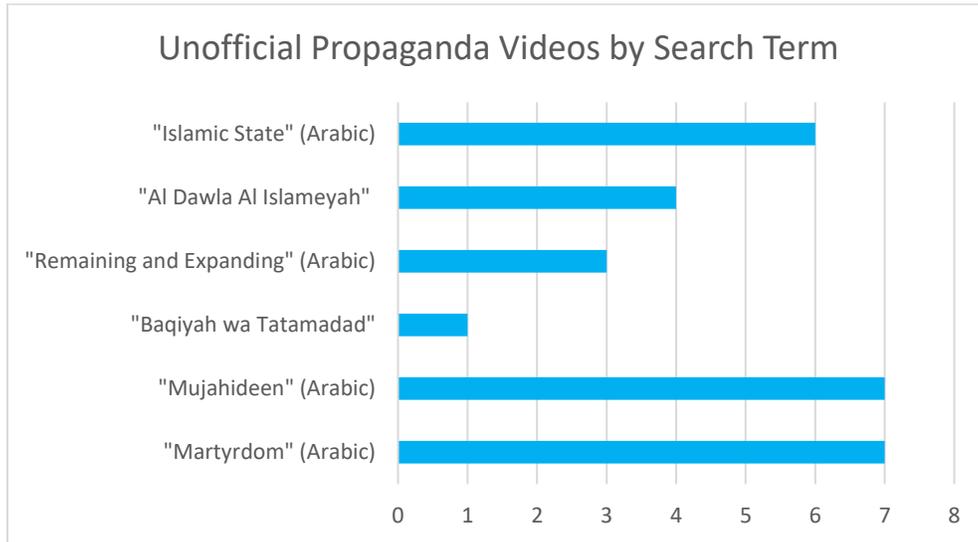

Of the 11 official non-ISIS extremist videos, 4 were found in the search results for “المجاهدين” (“mujahideen” in Arabic), and 6 were found in the search results for استشهادي (“martyrdom” in Arabic). These terms were not targeted by Google’s Redirect Method, and no counter-narrative videos were found in their search results.

The 24 unofficial propaganda videos were dispersed throughout the search results. Unofficial propaganda videos expressed support for a variety of extremist groups. CEP found that 10 expressed support for ISIS, 9 for an undetermined extremist group, and the remaining 5 for Ahrar al-Sham, the Taliban, Hamas, and Tahrir al-Sham. Of the 24 unofficial propaganda videos, 7 were found in the search results for “المجاهدين” (“mujahideen” in Arabic), and 7 were also found in the search results for استشهادي (“martyrdom” in Arabic). These two terms were not targeted by Google’s Redirect Method, and no counter-narrative videos were found in their search results.

OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE’S EXTREMIST VIDEO TAKEDOWN POLICY AND COUNTER-NARRATIVE PROGRAM

CEP also found 6 unofficial propaganda videos in the search results for “الدولة الإسلامية” (“Islamic State” in Arabic), a term specified by Google’s Redirect Method.

Counter-Narrative Videos

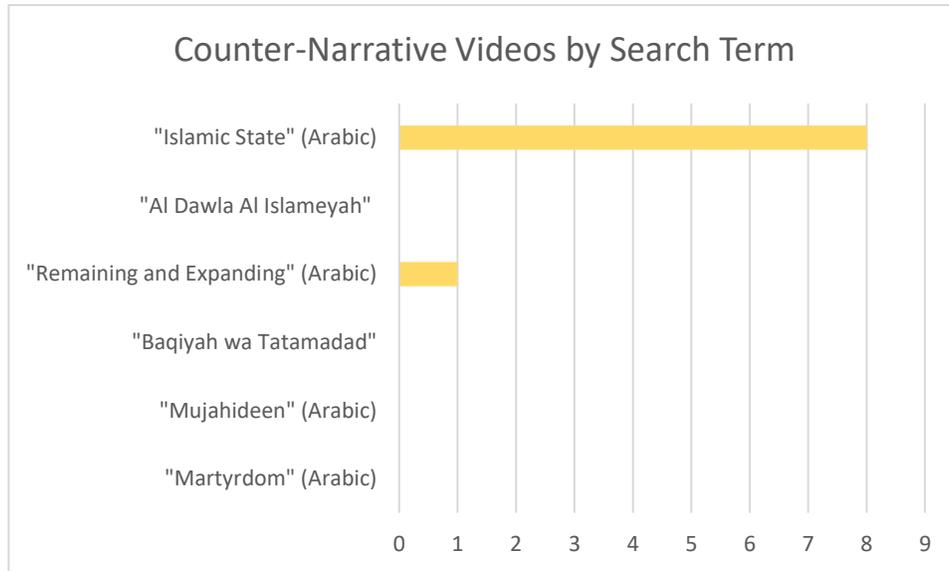

A total of 9 counter-narrative videos were found in all of the search results,¹⁰ representing only 1.4% of the 649 total videos reviewed by CEP. In contrast, extremist videos comprised more than 5.5% of the total. All 9 counter-narrative videos were targeted at ISIS: 8 appeared in the search for “الدولة الإسلامية” (“Islamic State” in Arabic), and the remaining one appeared in the search for “باقية و تتمدد” (“Remaining and Expanding” in Arabic). Both of those terms are identified explicitly by Google’s Redirect Method as keywords targeted for counter-narrative messaging. However, no counter-narrative videos at all appeared in the searches for “Al Dawla Al Islameyah” (the English transliteration of “Islamic State” in Arabic), or “Baqiyah wa Tatamadad” (the English transliteration of “Remaining and Expanding” in Arabic)—though they are also identified explicitly by Google’s Redirect Method as keywords targeted for counter-narrative messaging.

No counter-narrative videos were found in the search results for “المجاهدين” (“mujahideen” in Arabic) or “استشهادي” (“martyrdom” in Arabic)—although more extremist content was found in their search results than in those of any other term.¹¹

¹⁰ This analysis includes the 649 total videos reviewed from all searches conducted—unfiltered and filtered.

¹¹ This remains true even when the additional two filtered searches for “Islamic State” in Arabic are taken into account. In total, 7 extremist videos were found in the three searches for “Islamic State” in Arabic. In contrast, 11 extremist videos were found in the single unfiltered search for “mujahideen” in Arabic, and 13 were found in the single unfiltered search for “martyrdom” in Arabic.

***OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE'S EXTREMIST VIDEO TAKEDOWN
POLICY AND COUNTER-NARRATIVE PROGRAM***

Additional Concerns with Google's Redirect Method

In addition to the fact that the amount of extremist content on YouTube far exceeds the presence of Google's counter-narrative videos, there are also three key concerns regarding the design and efficacy of the company's Redirect Method.

First, disregarding unwanted content is easy for every user—including jihadists. When people deal with large quantities of information, they sort it based on its immediate usefulness. A user searching the Internet for a specific video will easily disregard extraneous content. Though counter-narrative videos can be compelling or deeply affecting, they can also be easily ignored. Counter-narrative content is also often recognized and pointed out for what it is by YouTube users in comment sections. For example, almost all of the 80 comments on one counter-narrative video uploaded to YouTube feature obvious pro-ISIS rhetoric, and several others point out the fact that the account that uploaded the video blatantly features the U.S. State Department's logo as its icon.¹²

Second, the problem of extremist content on YouTube isn't only about watching and searching for videos on the site itself. ISIS supporters use other platforms, such as the encrypted messaging platform, Telegram, to regularly post and share links to videos on YouTube and other video sites. The videos posted on these sites are often private or unlisted, meaning they cannot be searched for using keywords and can only be found on YouTube via their specific URLs. No matter how much counter-narrative content YouTube adds, the online supporters of

***OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE'S EXTREMIST VIDEO TAKEDOWN
POLICY AND COUNTER-NARRATIVE PROGRAM***

ISIS and other extremist groups will continue to purposely post and link to extremist content there from platforms outside of YouTube.

Third, Google's measures come woefully late, given that they were first announced in February 2016. In the roughly 28 months since Google previewed what later become the Redirect Method, a high-profile terrorist attack has been linked to content found on YouTube. Manchester bomber Salman Abedi relied, in part, on ISIS bomb-making instructional videos on YouTube to build his explosive device.¹³ That same video was still on YouTube almost two months after the May 22, 2017 suicide bomb attack. The members of the Barcelona terrorist cell who accidentally blew themselves up prior to the August 2017 vehicular attack in the city were making a TATP-based explosive device with the same chemical composition as the DIY bomb presented in the ISIS bomb-making video on YouTube.¹⁴

Conclusion

Extremist propaganda—including violent propaganda—is still readily accessible on YouTube. **Out of the 649 videos manually reviewed and analyzed by CEP, 36 videos (more than 5.5%) contained extremist content.** Out of those videos, 18 included content that was explicitly violent or gory. However, official ISIS propaganda appeared comparatively less often. Only 1 video found was an official ISIS propaganda release, while 11 were official propaganda releases from non-ISIS extremist groups, and the remaining 24 videos were unofficial propaganda videos. These numbers suggest that although YouTube may have improved its takedown practices, especially for ISIS videos, terrorist networks and their supporters still employ the platform to spread official propaganda videos and violent content.

Meanwhile, Google's efforts to promote counter-narrative content appear to be inconsistent and insufficient. **For the 649 videos checked, CEP was 4 times more likely to encounter extremist material than counter-narratives.** All 9 counter-narrative videos were found in the search results for two terms that Google's Redirect Method specified were targeted for counter-narrative messaging—"الدولة الإسلامية" ("Islamic State" in Arabic) and for "باقية و تتمدد" ("Remaining and Expanding" in Arabic). However, no counter-narrative material was found in the search results for two of the other terms specified by Google's Redirect Method as targeted for counter-narrative messaging, "Al Dawla Al Islameyah" (the English transliteration of "Islamic State" in Arabic), and "Baqiyah wa Tatamadad" (the English transliteration of "Remaining and Expanding" in Arabic). Furthermore, Google's efforts to remove extremist

***OK GOOGLE, SHOW ME EXTREMISM: ANALYSIS OF YOUTUBE'S EXTREMIST VIDEO TAKEDOWN
POLICY AND COUNTER-NARRATIVE PROGRAM***

content and promote counter-narrative messaging do not appear to be equal between unfiltered and filtered searches. Although counter-narrative content outnumbered extremist content in the unfiltered search for “الدولة الإسلامية” (“Islamic State” in Arabic), it did not when filters were applied.

There was a decrease in the amount of counter-narrative videos found on YouTube since CEP's last assessment using the same methodology in April 2018, suggesting that Google has not improved its implementation of the Redirect Method Program in any way in recent months. Although the number of extremist videos found decreased from 53 (7.4% of all videos reviewed) in April 2018 to 36 (5.5% of all videos reviewed) in August, the number of counter-narrative videos also decreased from 15 (2.1% of all videos) to 9 (1.4% of all videos). Whereas CEP found that users were about 3.5 times more likely to find extremist content than counter-narratives in its April assessment, that figure increased to 4 times more likely in August. Extremist material—pertaining to both ISIS and non-ISIS groups—continues to persist on the platform in far larger quantities than counter-narrative material.

YouTube's efforts to combat terrorist content on its platform appear to be primarily targeted at ISIS. Nonetheless, not only has the company insufficiently addressed the presence of ISIS material, it has also failed to make similar efforts targeting non-ISIS terrorist and extremist content. CEP found four times more official non-ISIS extremist content than official ISIS content, but found no counter-narrative videos targeted at a non-ISIS extremist group. CEP encourages YouTube to focus on ensuring a more consistent and encompassing application of counter-narrative messaging, as well as the removal of *all* extremist and terrorist material from its platforms, in line with YouTube's own public statements and company policy.
